

298 GO terms clustered by 'binary_cut'

cellular macromolecule triphosphate acetylation
organonitrogen nucleobasecontaining ribonucleoside electron
purine catabolic small nucleotide purinecontaining
biosynthetic nucleoside organic monophosphate

process metabolic compound

membrane reticulum endoplasmic
cotranslational transport
establishment
targeting localization

chain mitochondrial
respiratory large ribosome organization small
ribonucleoprotein complex
biogenesis ribosomal
subunit assembly

signaling ligand immune cellular
unfolded antimicrobial absence
response humoral
