

298 GO terms clustered by 'binary_cut'

cellular macromolecule triphosphate acetylation
 organonitrogen nucleobasecontaining ribonucleoside electron
 purine catabolic small nucleotide purinecontaining
 biosynthetic nucleoside organic monophosphate

process metabolic compound

membrane reticulum endoplasmic
 cotranslational transport
 establishment
targeting localization

chain mitochondrial
 respiratory large ribosome organization small
 ribonucleoprotein complex
 biogenesis ribosomal
subunit assembly

signaling ligand immune cellular
 unfolded antimicrobial absence
response humoral
