

# 209 GO terms clustered by 'binary\_cut'

potassium plasma cation chloride across  
**transmembrane** inorganic  
**transport ion** sodium

assembly  
**recombinase** telomere strand dna  
**repair doublestrand** break

cellular  
**homeostasis** ion potassium

cell mitotic positive  
**transition phase** cycle gs

repolarization potential action  
**membrane** depolarization

sulfate acid  
**biosynthetic** metabolic longchain purine  
**process** chondroitin fatty

**bmp** response signaling pathway

**acetylation** histone positive regulation
